### ABOUT ME

Full Stack Developer with 3 years of experience building high-performance, dynamic applications. My core toolkit includes TypeScript, React, Next.js, and Vite, which I use to create seamless, animated interfaces styled with Tailwind CSS and brought to life with Framer Motion. I leverage MongoDB for data solutions and utilize AI-assisted development to streamline my workflow, optimize code, and accelerate the delivery of robust, user-centric products. I thrive in collaborative environments where I can quickly master new challenges and focus on innovating solutions that enhance both user experience and technical performance.

### PROFESSIONAL EXPERIENCE

#### Full Stack Developer

**Exologic LLC** - November 2025 - Present

I specialize in building and maintaining full-stack applications, crafting clean user interfaces with Next.js, and connecting them to MongoDB databases through robust APIs.

- Developed and maintained web applications using Next.js and React.
- Implemented RESTful APIs with Node.js.

#### Website Manager / Full Stack Developer

**Red Caribe y Amazonia** - June 2025 - October 2025

I am dedicated to building a digital platform that preserves Indigenous, Caribbean, and Amazonian heritage through research-driven education, cultural documentation, and environmental protection initiatives.

- Manage and maintain the organization's website.
- Develop content for environmental awareness and dissemination.

#### Intern Frontend Developer Engineer

**Vainilla Labs** - December 2022 - January 2025

I designed and built Vainilla Labs, a financial platform that provides personalized financing plans and savings fund management. Using React, TypeScript, Tailwind CSS, and Framer Motion, I created an intuitive interface that enables users to seamlessly track contributions, manage investments, and monitor their financial growth.

- Built responsive user interfaces with React and TypeScript.
- Optimized application performance and user experience.

#### Frontend Developer

**Trillion Quest** - March 2022 - November 2022

I developed an AI-powered enterprise platform to automate manual processes and boost productivity. Using Next.js, React, and TypeScript, I built a robust core, then crafted a seamless modern interface with Tailwind CSS and Framer Motion

- Developed and maintained web applications and features.
- Learned modern web development best practices.

### EDUCATION

<b>Computer Engineer</b> URBE 2015 - 2019	<b>Software Developer in React</b> Platzi 2020-2022	<b>Computer Engineer</b> UPTMA 2024 - Present
