PROFILE

Always in constant learning, my journey is divided between studying programming, creating games with Python, and web development. I am a big fan of anime and reading, which allows me to keep an open and creative mind. I enjoy the perfect combination of the logic of programming and the imagination that storytelling awakens. Ready for new challenges and opportunities in the world of development!

WORK EXPERIENCE

Ser Cuidado Course Platform
Content creator   2024 - Present

- My job involves developing, structuring, and uploading study topics to a course platform, ensuring that students have access to relevant and well-organized materials. Additionally, I design and create tests to evaluate students' learning, ensuring that the content is clear, understandable, and tailored to their educational needs

Intern Front-End Engineer at Vainilla Labs
Frontend Developer   2024 - Present

- I currently work as an Internal Frontend Developer, collaborating with the Vainilla Labs team to enhance user experience in our applications by creating tools that help users improve their productivity systems.

Trillion Quest
Frontend Developer   2023 - 2024

- Creation and development of new modules for the "https://www.trillionquest.com/" website system, utilizing technologies such as React, Tailwind, and DaisyUI. Demonstrated strong project management skills and effective collaboration through version control and design teamwork. Additionally, contributed to the creation of a PostgreSQL database

Data Consulting Vision
Data Consulting Assistant   2021 - 2023

- I worked under the supervision of data consultants or analysis teams to assist in the collection, organization, analysis, and interpretation of large volumes of data. My role involved collaborating in the preparation of reports, data cleaning, creating visualizations, and performing statistical analysis
